

EMPOWER WOMEN BY EDUCATING MEN

By Lara-Anna Wagner and Sowmya Rajan

Rape cases in India

More than 128,000 rape cases were pending trial in Indian courts by end-2017, the latest year for which data is available.

Rape cases with female victims by age group

Out of the 33,000 reported victims in 2017, about 30 percent of the victims are children.

Total rape cases reported by year

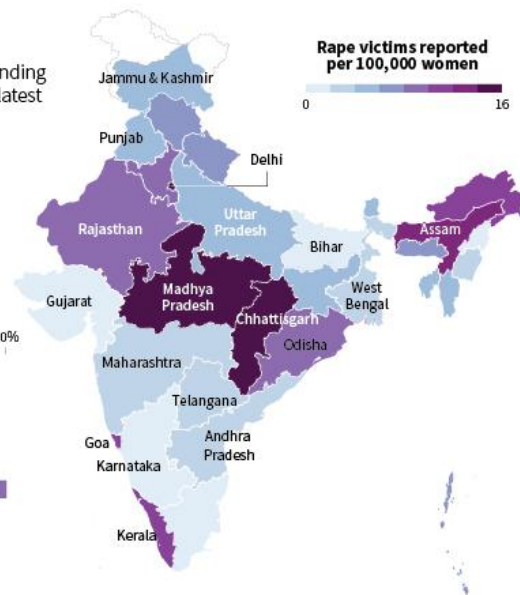

Charged cases and conviction rate

Note: Crime statistics in India follows the primary offence rule. In an event where the victim is raped and murdered, the incident will be recorded as a murder and not rape, because the primary offence is what the government considers the "most heinous crime" - in this case, murder. Such cases will be excluded from data about rape.
